George Boholteanu

Junior Software Engineer

I am a software engineer based in London with a curios mind in learning about new technologies and self development. Drawing from my background in Architecture and Visualization, where I focused on delivering exceptional user experiences through ultra-realistic CGIs, I am excited to enhance my software development knowledge to create well-rounded, user-centric applications.

DEVELOPER EXPERIENCE

Front End Developer Intern - ZEDSOFT (Jan 2024 – Present)

- Worked on a Laboratory Information Management System (LIMS) in creating VueJs components according to web designer wireframes.

Web Developer Intern - PROFILETREE (Sep 2023 – Dec 2023)

- Conducted in-depth competitor analysis for a comprehensive career guidance app presenting findings to leadership.

- Wireframing landing pages using Figma

- Web Designing using Wordpress to create landing page and a quizz app.

EDUCATION

UDEMY (Sep 2023)

The Complete 2023 Web Development Bootcamp

EDX Trilogy (Nov 2022 - Mar 2023)

Front End Web Development Bootcamp**

- Developed a series of web applications utilizing Agile methodologies.

- Good understanding of HTML, CSS, Tailwind, JavaScript, React and Node.js.

- Created a Freelancer Booking App, a Trivia App using Trivia API and GIPHY API, Personal Portfolio, and a Weather Dashboard using Openweather API.

SOLOLEARN COURSES
- Python for Data Science Course (Dec 2021)
- Python Intermediate Course (Dec 2021)
- SQL Course (Nov 2021)

Univ. of Architecture, Bucharest, Romania

Master in Architectural Design (Jul 2014)

PERSONAL PROJECTS

- Restaurant Reservations and Food Ordering using NextJs, Prisma and Docker, Typescript, CRUD, PostgreSQL
- Portfolio app using NextJs, TypeScript, Framer Motion, Vercel and Vite
- Web design for a Fitness Club. Node-Sequelize, MySQL database
- Designed and developed a Python-based Smart Assets Manager UI for data organization and web scraping.
- Conducted web scraping and data wrangling for Premier League match results using Python.
- Created animated data visualizations using Flourish App and developed UI tools for automation using Maxscript
